## History

Since its establishment in 1999, Seaharvest Egypt has been providing high quality solutions to the Egyptian Oil and Gas industry. Our keenness in offering the finest products as well as the hard work of our dedicated team has guaranteed us an eminent position amidst oil and gas service companies in the market.

We offer solutions in the fields of Drilling, Pipeline and Process, Production enhancements and Supply Chain services.

Seaharvest Egypt is part of the Seaharvest Group. The Seaharvest Group is one of the foremost private sector groups serving the Oil & Gas Industry in Egypt and North Africa.

## Highly Skilled Team

In Seaharvest we consider our team to be one of our biggest assets. We encourage the development and growth of our employees, while stressing on values of integrity, honesty and dedication.

We operate based on a customer-oriented approach focused on the customers' needs and requests. Seaharvest is proud to have a highly qualified group of engineers collaboratively working towards delivering the highest degree of customer satisfaction.

Through working in mini-teams dedicated entirely to each customer, we aim to offer the utmost level of excellence in our services:

- To be more customer focused and increase the customer network and relations.
- To have one responsible sales person for each account, in order to avoid customer confusion to have more faces to see.
- To increase the market intelligence and have updated customer information.

## Strong Client Base

Through its years of expertise and its fine reputation, Seaharvest has been able to obtain a wide client base in the Egyptian market. We at Seaharvest strive to develop friendly bonds with our clients. We have formed very strong relations with our clients while maintaining transparency on all aspects related to the company and the business. Each of our clients, regardless of the revenue it yields us, is treated with equal value and dedication.

## Regional expertise

Operating for more than 10 years in Egypt, Seaharvest has gained high regional expertise. Our staff has been stationed all around Egypt, causing them to get acquainted with the climates of each specific concession and adapt easily to the work conditions.

## Competent Solutions

**Product quality:** Each service is engineered with advanced technology and delivered using trained personnel to ensure the highest levels of quality. The products we offer are certified and comply with international quality regulations.

**Service diversity:** One of our main competences is the variety and range of services we offer at Seaharvest. Marketing all Seaharvest principals and product lines is a very challenging task due to the diversified products and services that we offer. In order to make this task more simple and based on a logical flow, Seaharvest marketing

strategy is based on the Well Life Cycle and the supporting operations serving it from logistics, piping and refining.

Looking into the creation and life cycle of a well, we will find it divided into five segments:

- 1- Planning
- 2- Drilling
- 3- Completion
- 4- Production
- 5- Abandonment

Based on this logical manner, we have grouped all the services and the products into four main solutions and each Solution has its own categories of services as follows:

## Drilling Solution

Seaharvest represents the top class international service providers in the manufacturing of downhole tools, casing accessories, drill string components, handling tools.

**Among these companies are:**

**Boots & Coots** the world's No.1 blow-out prevention, response and pressure control company.

**Downhole products (DHP)** who invented the world's first zinc-alloy rigid body centralizer Spir-o-lizer™ and Pen-o-trator™ reamer shoes.

**National Oilwell Varco (NOV)** the world leaders of drilling jars, drilling tools and GRE pipeline Premiere Oilfield Rentals as part of Superior Energy Group, specialize in rentals of drilling tubular and handling tools.

**REEL** who specialize in inspection services by providing a wide range of inspection techniques Seal-Tite the experts in downhole leak repair by sealant injection.

**Downhole Tools (Service,Rental,Selling):**

- Drilling Jars
- Intensifier tools
- Shock tools
- Drilling Bumper Subs
- Drilling Stabilizers
- The Agitator
- Fishing Tools
- Internal Catch fishing tools
- Bowen Milling and Cutting Tools
- Andedrift
- Andergauge
- PBL SUBS
- Subs

**Casing Hardware**

- Rigid Body Centralizers (Zinc-Alloy, Steel, Aluminium)
- Reamer Shoes
- Pilot Guide Shoes
- Bow & Positive Centralizers
- Cementing Floating Equipment
- Float Shoes            - Cementing Plugs
- Float Collars        - Scratchers
- Stage Tools         - Baskets

**Tubulars and Handling Tools (Rentals, Selling)**

- Drill Pipes
- Drill Collars
- Tubing
- Hydroclean
- Landing Strings
- Glass Reinforced Epoxy Pipes (GRE)
- Handling and Running Tools

**Leak Repair Services**

- Drill Pipes
- Casing Leaks
  - Liner Hanger Leaks
- Control Line & Safety Valve Leaks

**Supporting Services**

- Safeguard risk prevention services
- Blowout Response
- Pressure Control Rental Tools
- Solid Control Equipment
- Inspection Services
- Magnetic Particle Inspection
  - Dye-Penetrant Inspection    - Wall Thickness Gauging
  - Eddy Current Inspection    - Hardness Testing
  - Ultrasonic Inspection       - Pressure Testing
  - Electro Magnetic Testing    - Load Testing up to 200 Tone on Steel Wire Ropes
  - Visual Weld Inspection

## Production Enhancements

Seaharvest is committed to bring the latest solutions to ensure the smooth production of oil wells and this is by providing a different range of artificial lift equipment and by saving production rates and time through rig-less operation repair of downhole leak repair. We also provide well control equipments and hydraulic workover/snubbing (HWO) units for work over operations. These services are achieved through partnership with Boots & Coots, Downhole Products, National Oilwell Varco and Seal-Tite.

### Progressive Cavity Pump

The NOV Monoflo line of downhole progressing cavity pumps (PC Pumps) are designed for use in both oil and coal bed methane recovery applications where the economics of oil and gas production demand efficiency, reliability and low life-cycle cost from the pumping equipment.

### Sucker Rods Pump

NOV Monoflo's rod pump systems can easily be adapted to pump a variety of well fluids. The right combination of manufacturing, engineering and application expertise offer practical cost-effective solutions to pumping problems. National Oilwell Varco offers a completely integrated family of API pumps, specialty pumps and accessories and NOV is uniquely positioned to address all rod pump requirements regardless of well conditions.

### Artificial Lift Equipment (Selling, Service)

In a world of unpredictable energy prices, one thing that can be counted on for consistency is the increasing extraction price of oil and gas due to the ever increasing geological and technical challenges that production companies face. In today's oilfield, the time has never been better to get serious about gaining control of and reducing your lifting costs. Seaharvest provides you with the best artificial lift equipments in the market through National Oilwell Varco.

### Hydraulic Workover Units (Service)

Hydraulic Work Over / Snubbing Units give the ability to complete, repair, or re-enter an oil or gas well. Especially valuable in technically challenging situations such as sensitive formations, horizontal underbalanced drilling, and re-entry side track operations. Much of the equipment is own manufactured, resulting in a faster, fit-for purpose deliverable. Boots & Coots stand-alone units are modular, so they can be easily handled in off-shore environments.

### Cross Coupling Protectors (Selling, Service)

GRIPPY Cable Clamp Protectors aim to convey and secure ESP cables and control lines in and out of wellbores quickly, safely and efficiently. They are manufactured from pressed galvanized steel and can be offered in higher alloys to fit your well needs. The installation is undertaken by means of a hydraulically-driven tool to ensure that the installation of each protector will take as low as 45 seconds.

### Leak Repair Solutions

- Wellhead Leaks
- Tubing Hanger Leaks
- Casing Leaks
- Micro Annulus Leaks
- Subsea Connection and Umbilical Leaks
- Control Line & Safety Valve Leaks
- Tubing Leaks
- Packer Leaks
- Flow-line Leaks
- Valve Leaks

## Pipeline and Process

Seaharvest, in partnership with world-wide experts like Proserv Offshore, Seal-Tite and Walker Technical Resources provides services such as inspection, protection and repair of leaks in pipelines. In addition, we provide to subsea solutions including decommissioning, abandonment services and specialized high pressure pumping techniques. We also offer support services for oil and gas projects and production companies by supplying a wide range of valves, pumps, brands and fittings.

### Cold Repair Services

Seaharvest, with Walker Technical Resources "WTR", uses state-of-the-art composite materials to provide validated and industry approved engineered pipe repair systems. These materials are now widely accepted in the oil & gas industry in Egypt as a cost-effective repair alternative to traditional metallic repair techniques.

### Armawrap

Seaharvest provides the latest technology of Armawrap material, which has been specifically designed to facilitate passage through the conductor guide tubes during drilling operations. It's a wraparound corrosion protection and anti-foulant system which provide an easily installed encapsulation system under "cold-work" conditions for the cladding of subsea pipelines, vertical risers and piles in the Splash-Zone.

### Decommissioning Contractors & Engineers and Abandonment Services

- Complete platform, pipeline and well decommissioning
- Decommissioning project management
- Consulting services
- Well plugging and abandonment
- Subsea well abandonment
- Conductor cutting and removal

### Subsea & Marine Technology

- Cold cutting systems including water abrasive and diamond wire/ reciprocating technologies.
- Seabed dredging systems.
- High pressure cleaning and coating removal systems.
- Friction Stud Welding systems for anode and grating attachment.

### High & Ultra High Pressure Pump Services

- High pressure and ultra high-pressure pumps for offshore and onshore use.
- High flow flushing, pressure testing & filtration units.
- Hot water jetting units for onshore use Specialist accessories.

## Supply Chain Services (general supplies)

The challenge currently facing many of our customers is the costs associated with the burden of supply chain management where the cost of ownership extends far beyond the price of the product. Seaharvest and NOV Distribution Services provide our customers with the widest Supply chain to cover all their needs through our warehouses in Egypt, Dubai, Houston, UK, Canada and others.

### Fittings

- Coupling Dresser Sleeves, Sleeve Parts
- Carbon Steel Elbows, Tees, Blind, Threaded, Weldneck
- Nipples, Swage Nipples
- Plugs Bull
- Forged Steel Bushing Hex, Couplings Pipe, Elbows, Plug Pipe Hex, Tees, Threadlets
- Malleable Iron Coupling Pipes, Elbows, Plug Pipe Square, Tees
- Gaskets, Ring Joint, Spiral Wound
- Hose Fittings, Camlocks, Clamps, KC Nipples
- Unions, Hex, Wing

### Mill supply

- Abrasive Cloths
- Absorbent Pads & Rags
- Batteries
- Bolts & Studs
- Broom And Brushes
- Chains, Grab Hooks & High Test, Roller, Roller Parts
- Cleaners: Hand, Rig Wash
- Compounds: Pipe Dope, Thread
- Coveralls
- Electrical Supplies
- Engines O-Rings
- Filters, Baldwin
- Flashlights

- Gauges: 2-1/2" and 4"
- Gloves
- Hoses: Red Rubber
- Lamps
- Lifting: Shackles
- Lubricants
- Office Supplies
- Paints, Sprays
- Rope: Sash, Manila And Nylon
- Safety Supplies: Boots, Chemicals, Eye Protection, Fall Protection, Fire, Hard Hats, Hearing, Marine, Respiration, Tape
- Wire Ropes: Clamps, Clips

### Tools

- Hammers
- Pliers
- Ratchet
- Screwdrivers
- Sockets
- Wrenches
- Cables
- Spare Parts for Mud Pumps; Gaskets, Liners, Pistons
- Diaphragm, Inserts, Swivels, Gauges, Tong

### Valves

- Ball
- Butterfly
- Gate
- Needle
